To Whom It May Concern

I had been involved in protracted negotiations with a couple of banks to restructure the financial requirements for my farm without obtaining a satisfactory result.

I was introduced to Garry, who promptly recognised the finance needs for my farm and knew which facilities could best address the requirement to fund its development. He clearly discussed the issues with me and implemented the borrowing process from application to settlement. I have now had a couple of years experience with the bank Garry introduced me to, am very pleased with the manner in which the facilities are managed and in particular am confident in the ongoing relationship maintained with that bank.

Garry's down to earth approach, knowledge of financial services and procedures achieved a prompt result, saving me time and money.
