

Great to deal with Garry..... who is a professional financial consultant. My business has been in our family for several generations and I had an opportunity to expand its turnover and profitability. However, our current bank with whom I have had a long term relationship declined any additional financial help.

Garry immediately understand the needs of my business and had a solid knowledge of financial facilities which would address these requirements. He carried out performance and financial analysis on my business and discussed the out comes with me. He prepared the requisite application, collated all the supporting data and managed the process thorough to settlement.

He raised capital for my business promptly and cost effectively..... saving me time and money and made the whole process appear simple.
